Most present controversies in the field of philosophy turn upon some difference which is fundamentally logical. There is need, therefore, to re-examine and clarify the underlying conceptions of logic. Any one of the great historical systems of logic offers a species of laboratory example of the shaping of logical concepts under some specific point of view, and the difficulties which it leaves unresolved offer valuable experimental material for further logical construction. It is with such a purpose that this paper undertakes an analysis of the relation of inference to fact in Mills logical system. In constructing a theory of inference Mills problem was to reconcile the associationism of the English empirical school with the procedure of modern physical science. He occupies alternately the subjective point of view of the one position and the objective point of view of the other. This oscillation of position comes out strikingly in the varied...
