Brand New Book ***** Print on Demand *****.Excerpt from Chemistry for Photographers The first essentials to anyone studying chemistry are accuracy and cleanliness. Most of the surprising results obtained by students in their early days are due to want of cleanliness. Another point I should like to impress upon those just taking up the subject is that learning facts in a more or less mechanical way is not learning chemistry. It is said that a good lawyer does not know much law, but knows where to find his law. The same applies to a good chemist. Above all, endeavour to get an insight into the nature of things, and remember that the proper place for a dictionary is not inside a man s head, but on a shelf.
