

Global Riemannian Geometry: Curvature and Topology

By Steen Markvorsen

Birkhäuser Mai 2003, 2003. Taschenbuch. Book Condition: Neu. 254x178x5 mm. This item is printed on demand - Print on Demand Neuware - This book contains a clear exposition of two contemporary topics in modern differential geometry: distance geometric analysis on manifolds, in particular, comparison theory for distance functions in spaces which have well defined bounds on their curvature the application of the Lichnerowicz formula for Dirac operators to the study of Gromov's invariants to measure the K-theoretic size of a Riemannian manifold. It is intended for both graduate students and researchers. 100 pp. Englisch.

Reviews

This type of ebook is everything and got me to seeking in advance plus more. it was writtern really completely and helpful. You wont feel monotony at at any moment of your respective time (that's what catalogues are for about should you request me).

-- **Dr. Santino Cremin**

These sorts of pdf is the greatest pdf available. It really is writter in simple words and never difficult to understand. I am just very easily could get a delight of studying a written ebook.
